30 January 10am **Living the new story of peace. London EC1** www.stethelburgas.org
A discussion-based workshop exploring new understandings of peace and systemic change. In the past, conflict and peace have been viewed through the lens of polarity. Parties with opposing views disagree and generate friction. Peace is about coming to understand 'the Other' and achieving resolution, which is expressed through the cessation of argument. In today's multicultural, diverse and increasingly interconnected world, new models of peace are emerging. Difference is often not about 'us' and 'them'. We are increasingly aware of multiple dimensions of diversity, and the tapestries of grey areas and rich complexity within any relational field. Alongside this we are coming to understand our fundamental interdependence with each other and our ecological systems. All of this alters in profound ways our understanding of 'self' and 'other' and so has important implications for how we approach peace work and community building.

Tuesday **24 February** 18:30-20:00 **The Scandal of a Male Bible. Lecture by Professor David Clines** at Kings College, London WC2.

The Bible is a male book, written by men, to be read by men. That means that it is permeated by characteristically male values and ideals, some overt, others rarely noticed. Among these values are: the glorification of strength; the valorization of strength in action, which is violence; the approval of killing; the quest for honour; the tendency to misogyny. These embedded values continue to influence Bible readers, often subconsciously. They are most potent when they affect the language of religion, and shape the picture of the Bible's deity, the God of Christian and Jewish believers. The scandal is twofold: it is that the Bible is deeply compromised by its ubiquitous adherence to specifically male values, and that its masculinity is hardly ever noticed or mentioned, even in our much more egalitarian world.

Professor David J.A. Clines is "one of the most creative and influential biblical scholars in the world". Originally from Sydney, Australia, David Clines has spent his career in the University of Sheffield, including as Professor and Head of the Department of Biblical Studies. It is a measure of his distinction that he was President of the US-based Society of Biblical Literature in 2009, the first person from outside North America to serve the Society in that role.

Refreshments will be served after the lecture on the Terrace. To book for this free lecture go to Eventbrite: www.kcl.ac.uk/artshums/depts/trs/eventrecords/2015/ethel2015.aspx. "Look Within: You Are Christ" represents a recurring theme within Gnostic Christianity during the first few centuries of this era. Martin will draw on teachings from the Gospels of Mary, Philip and Thomas, and other texts from the same period. The same invitation, although less apparent, can be found in the New Testament teachings of Jesus and the apostles, and the witness of Christian mystics up until the present time. Gnostic Christianity offers an experiential path of awakening from our mistaken "separate" identity.

27 March 10 am **Co-creation and emergent design** London EC1, www.stethelburgas.org

How can we facilitate spaces that allow new, unexpected and collaborative solutions or responses to emerge? A shared inquiry into the principles of working with emergence and co-creation - key skills for our times. In the face of disastrous conflicts around the world, as well as deepening ecological and economic crises, it seems that if there is to be a future for us, we must make a momentous transition to an entirely new way of being, seeing, relating and organising. To discover this 'new story' and bring it into how we live and work requires new forms of partnership and collaboration. It requires being able to create from a space which is not hampered or pre-determined by old structures or ways of operating. We need to create

from a space that is new, where we recognise the need to go beyond our existing paradigms. This means being comfortable with not knowing, and being able to work with space as well as content. This one-day gathering is to offer a shared enquiry into the principles of how we can facilitate groups in this way.
